FEATURES & BENEFITS

popular steel cable ties with "ladders" for wide range of cable bundle diameters

for difficult climatic or environmental conditions

LOGISTIC DATA

Quantity in package [pcs]

100

There is an elastic toothed latch in the buckle. After tightening of the tie, the teeth fall into the holes in the tie, so it is impossible to pull it back. The strip is perforated over the whole length so it is possible to tighten the bundles of various diameters. The solution is designed also for outdoor applications, possibly in marine conditions.

Permissible operation in the mining and chemical industry.

Shield, OP-TS type

FEATURES & BENEFITS

- TSB tie shield in rolls
- protects bundled elements against damage caused by steel tape

LOGISTIC DATA

Quantity in package [m] 25

APPLICATION

for inserting on the TSB cable ties to insulate the steel ties from a bound bundle or for ensuring flexibility of the tightening on non-deformable fixing elements .
