

FEATURES & BENEFITS

perfect tool for cutting small plastic profiles and PVC conduits

90° angle blade facilitates cutting

reversible blades - two cutting tips

LOGISTIC DATA

Type	NKU 35
Index Ergom	E02KK-09010401001
Weight [kg]	0,42

Shears are designed to cut stiff and half-stiff tubes and small profiles made of hard plastics (e.g. covered by the Ergom offer: helicon tubes WTG, thick-wall electroinsulating PVC jackets and KN cable trays). Thanks to the angle blade (90 degrees), cutting is very easy. There is no need to rotate the object during cutting. Cut edges are smooth. Resettable blade (two cutting heads).

MECHANICAL DATA

Max. diameter of the pipe to be cut [mm]	35
